To: WaszuppNOW.Net Team

From: Stef & Karlyn, Leaders

---

As you know we have been working day and night to get genealogies structured via spreadsheets and interacting with Julie to get these uploaded appropriately. She has really stepped up and has made huge sacrifices to help our WaszuppNOW.Net Team. I have to admit we didn't realize what a huge job this would be. As well, we have been nudging PHPWW in the right direction with respect to improving their online services and it's not always easy to ask a company to change directions and consider a different approach.

I'd like to send out a **BIG thanks to our upline success leader David C.** for all his help with this process and helping us to get our message to Doc Lett and Julie. David has been instrumental in supporting our ideas and discussing them with PHPWW as well. **Thank you David C!**

Well tonight is a **GREAT** night, in that, that pesky lockout error is gone and the IT personnel here in the USA have made just terrific in-roads in correcting errors and scripting. **Great job and kudos go out to the IT department. Much thanks to our Founder and CEO Doc Lett for having the courage to change course and make the changes a reality tonight!**

If you go to the site <http://peoplehelpingpeopleworldwide.com> a huge change in speed and the back office functionality is off the hook. What a huge difference in performance and speed! It's very exciting to see.

We have a company in PHPWW that wants to work with us and help us make a real difference around the world. I am so excited that we are on our way to dream building again and we have the people in our corner that get us and will do everything they can to assist us in realizing those dreams, hopes and aspirations. **We are on our way as a team together!**

And finally, Karlyn and I want to thank you, all our team members, who have gone on this journey with us and have hung in there. **You are amazing people and it's our privileged to be associated with such a great group of business professionals. We are truly humbled.**

**Is there more work to be done...you bet. But, this is a great start of bigger and better things to come!**

Once Again... Thank You All,

**Stephan & Karlyn
